

Caldera support new Apple machines based on Intel Core 2 Duo processor

caldera.eu

Caldera, the french leader for software solutions dedicated on large format solutions releases the new « Universal Binaries » version supporting new Apple platforms running Intel Core 2 Duo processor.

Reinforcing the commitment of Caldera to the community of Apple users, and considering this new processor as a great opportunity to take benefit from more stable and faster machines, it was quickly decided to port the complete caldera product range on this new platform.

“Imaging solutions, and especially RIPing tasks, are highly demanding in terms of power calculation. From this speed depends all the productivity of the service provider.” says Joseph MERGUI, General Manager of Caldera. “Any gain of performance is immediately transformed in a better productivity and better revenues”.

Caldera solutions are available on Apple platform since 2003.

The new version 7.20 complies with the “Universal” standard from Apple, meaning that they can be run on both PowerPC and Intel platforms.
