

Caldera releases the new version 7.22 of its product range

Caldera Graphics, the French software editor leader in large format imaging and production workflow is launching the new version 7.22 of its successful range of products including many new features and devices.

New platforms :

- Caldera is now installable on Kubuntu 7.04 an easier to use, more stable and universally adopted Linux system

New features :

- The new "flip-flop" Tiling option prints all tiles located on odd columns with a 180 degrees rotation in order to ensure print reliability and eliminate forms of banding.
- In EasyMedia the measurement data (transition, linearization or profiling) is saved in the calibration files (.ppi, .ppc and .icc files), and therefore in the Media Patches. A new option now allows you to read the measurement back from the calibration files.
- Installation improvement: all printer drivers are now installable with software patches (downloadable from Caldera ftp's site).

New supported printers :

- Durst: Rho 351R, 160R & Rho 800
- Mutoh: DrafStation-Pro, ValueJet-2606 (Beta version).
- Nur: Expedio Inspiration, Expedio Revolution, Tango
- HP : DesignJet Z6100
- Epson: 11880, 9880, 7880, 4880

(only the 11880 has profiles. For the other models, they will come later)

- Epson: 9450, 7450, 4450 in Beta version, without any profiles.
- Colorspan : 5400 uv
- Canon : IPF5100, IPF6100
- Digital Sign Tech : Matrix 332, Matrix 364, Matrix 364 HQ
- DigitalHijet : X6320-A, X6250-A, X6164-A, X6184-A, S6320-A, X6250-A, S7240UV
- TeckStone : S3200
- Matan : Barak
- Keundo: SupraQ 3300 UV
- Cromajet Technology: DigiPress
- Gandinnovations: JETi 1224 Flatbed
- DGI: MegaJet, Polajet, SaturnJet (ST-1806), XP-2506, XP-2506D, XP-3204T

New supported cutters :

- Roland GX series (GX-300, GX-400, GX-500)

New color measurement device :

- Barbieri SpectroSwing.
This is an easy to use, versatile and reliable automatic spectrophotometer, for the linearization and profiling of photographic and wide format output devices for flexible reflective and transparent materials with a thickness up to 0,7mm. EasyMedia supports all the features of the device, including auto-positioning and "contact-less" reading.
